Learn the original tales behind *Percy Jackson*, *Hadestown*, *Circe*, *Song of Achilles*, and more. The myths of the ancient Greeks have influenced countless later works, including art and literature in English over the centuries and powerful critical adaptations in the present day. Explore the major narratives of ancient Greek (& Roman) myth through direct encounter with the original works. In this student-centered, discussion-based class, you will read key works of ancient myth in fresh recent translations and ask critical questions about these influential stories. *Students new to myth & students with lots of knowledge already are all welcome!*
